

The Stone Soup Leadership Institute's BETA Program
 Redwood High School CTE's Environmental Science & Tech Program

Trevor Tanaka, Sustainable Hawaii Youth Leadership Initiative
 Environmental Legislation

	<p>Who is Trevor? What did he do? What are three main takeaways from his story?</p>
<p>Campaign</p>	<p>With a partner: brainstorm an information campaign to educate students in your school/community on sustainability. Choose a scribe: What does sustainability mean to you? What are the best sustainability projects in your community? What kinds of sustainability projects would you like to see in your community?</p>
<p>Debate</p>	<p>With a partner, choose one of the following topics: agriculture, water management, renewable energies, and plastics</p> <p>How can we best address this sustainability issue? Why is it important to do so? How will it be difficult?</p>

After mini debate:	Which argument was most convincing and why? What do you think should be done for these issues?
Reflection	One of Trevor's main focuses is that Hawaii has the resources available to make sustainable changes. - What are some ways in which we as consumers of agricultural products can work to reduce the impact of agriculture on climate change (and therefore, in turn, the impact of climate change on agriculture)
Sustainable Careers -Summarize each career. - Describe what kind of person you see in each role -What characteristics would help them be successful?	Environmental Educator
	Legislative Staffer
	How to Run For Office
