

Your High School Is Invited to An Invitation-Only Event

The poster is for a virtual event titled "SustainWDN™ Green Job Shadow Day". It features a central image of Oscar Tobacia, an Offshore Wind Engineer, wearing a white hard hat with "PROJECT SUBSEA 7" and "OSCAR" written on it, and safety glasses. The background of the image shows offshore wind turbines. The text on the poster includes: "SustainWDN™ Green Job Shadow Day", "Premiere Sustainable Career Mentor Video Oscar Tobacia, Offshore Wind Engineer", "March 2, 2023 3pm EST/12pm PST", "Live Virtual Event", and "Register Today!". At the bottom, it lists the host "The Stone Soup Leadership Institute" and logos for "XODUS", "NEW BEDFORD OCEAN CLUSTER", "ATLANTIC SHORES offshore wind", and "SustainWDN".

Premier Sustainable Career Pathways Video Series Premiere
SustainWDN™ Green Job Shadow Day

[Register today!](#)

Oscar Tobacia, Offshore Wind Engineer Atlantic Shores Offshore Wind, will join us for the premiere of The Institute's Sustainable Career Pathways Video Series. In this video series, Oscar shares his journey and encourages young people to find mentors to guide them as they explore their careers. The Institute's Sustainability Coordinator Trevor Tanaka will share the Climate Education Curriculum's Sustainable Career Pathways.

On February 2, The Institute hosted the [first-ever Green Job Shadow Day](#) launched The Institute's Sustainable Career Mentor Initiative, a disruptive model designed to fast-track the workforce development pipeline needed to fill millions of new jobs that are anticipated in the emerging transition to a sustainable economy. Youth delegates from The Institute's 2023 Leadership Program joined us from Bristol County Agricultural High School in Dighton, MA. Here is the [customized site](#) we've built for their school with The Institute's Climate Education Curriculum.

We hope that you will [register today](#) to join this special opportunity to bring our Climate Education Curriculum to life!

Learn how The Stone Soup Leadership Institute's Climate Education Curriculum can help high school students prepare for the transition to a sustainable economy
-the greatest challenge of the 21st century!

Thank You to Co-Hosts XODUS & New Bedford Ocean Cluster
